

## Dr. Leon Chen, DMD, MS, DICOI

- Co-founder of the Dental Implant Institute Worldwide
- Graduate of Harvard University, School of Dental Medicine
- Graduate of Northwestern University –  
M.S. Periodontics Specialist
- Fellow and Diplomate of ICOI
- Fellow and Diplomate of ADIA

For the past 20 years, Dr. Leon Chen has been known as the inventor of Hydraulic Sinus Condensing (HSC) Technique, a minimally invasive sinus lift technique recognized as a gold standard. In 1996, he was the first dentist who invented a drill that can reach the sinus cavity. He was the first clinician to utilize EMD for root coverage and sinus lift. Chen also developed the flapless sinus, 5-in-1 immediate loading technique, vertical augmentation without block, and the most difficult task "lingual augmentation." Now he is developing a procedure and instrumentation that will revolutionize complicated implant cases into simplified cases, called the Hydraulic Membrane Lift (HML) with navigation. Dr. Chen is a founder of Dental Implant Institute World, known as a top facility in both implant treatment and education throughout the world. A Harvard dental graduate and Northwestern periodontist, Dr. Chen is now a visiting faculty member at the University of Pennsylvania. A consultant to numerous implant and publishing companies, Dr. Chen holds more than 30 patents and trademarks for surgical instruments, bone, implant navigation software, and implant prosthodontic parts and fixtures.
